PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2 years of experience building high-performance Java Spring Boot microservices and REST APIs for enterprise healthcare SaaS platforms. Delivered 40% throughput gains through Redis caching and database optimization, while engineering event-driven architectures processing 10,000+ daily events across distributed systems on AWS.

TECHNICAL SKILLS

Languages: Java, SQL, Shell Scripting

Backend & Frameworks: Spring Boot, Spring Security, Spring JMS, Hibernate, JPA, Microservices, REST APIs, SOAP

Databases & Messaging: PostgreSQL, Oracle, Redis, Kafka, Artemis ActiveMQ, AWS SQS

Cloud & DevOps: AWS (Lambda, SQS), Docker, Jenkins, Liquibase, Flyway, Git, GitHub, CI/CD

Testing & Tools: JUnit, Mockito, Postman, Logback, SLF4J, Maven, Gradle

PROFESSIONAL EXPERIENCE

Veersa Technologies

Noida, UP, India

Software Engineer | July 2024 – Present

HealthEdge — Backend Modernization

- Migrated legacy JavaEE monolith into 10+ distributed Spring Boot microservices, boosting throughput by 40% through query tuning and Redis caching.
- Engineered XML-to-PostgreSQL query transformers for 2+ external healthcare systems, automating data handling for 5,000+ daily records.
- Automated CI/CD pipelines via Jenkins and Docker, and managed 200+ Liquibase changesets across environments.
- Delivered 70+ JUnit/Mockito tests achieving 85% code coverage across microservices.
- Integrated OpenAI API into the clinical data pipeline to auto-classify patient records, reducing manual tagging effort by 60%.

Software Engineer Intern | July 2023 – July 2024

Kipu — Healthcare Scheduler & SSO Integration

- Engineered Single Sign-On (SSO) across the Kipu platform for 5+ microservices, eliminating redundant login workflows for healthcare providers.
- Introduced multi-tenant Redis caching, reducing database load by 40% and cutting average API latency by 150ms.
- Implemented reader-writer DB separation for high-throughput reads via Spring Boot.
- Architected AWS SQS-based async event processing for webhooks, reliably handling 10,000+ events/day.
- Built native SQL-to-JSON transforms improving API response times by 25%.
- Applied Factory, Builder, and Strategy design patterns across 4+ modules, shortening feature delivery by 20%.

Glorious Insights — Software Engineer Intern

July 2021 – September 2021 | Remote

- Fortified a client-facing portal with custom authentication and authorization using Spring Security, reducing unauthorized access incidents from 12/month to zero.
- Deployed Spring Batch pipelines for high-volume processing, accelerating throughput by 25% across 50,000+ records per run.

PROJECTS

Ecoshop | [GitHub](#) | Java, Spring Boot, JPA, Spring Security, PostgreSQL, Docker, JWT

- Exposed 15+ REST APIs for product catalog, order, and user management using Spring Boot and JPA.
- Hardened the application with Spring Security, JWT authentication, and role-based authorization.
- Containerized the full stack via Docker Compose, reducing local setup time from 30 min to under 2 min.
- Integrated Claude AI API to power an intelligent product recommendation engine, generating personalized suggestions from user purchase history.

EDUCATION

ABES Engineering College, Dr. APJ Abdul Kalam Technical University — B.Tech, Computer Science & Engineering

2020 – 2024 | UP, India | CGPA: 7.99

CERTIFICATIONS & ACHIEVEMENTS

- 600+ problems solved on LeetCode and GeeksForGeeks across arrays, trees, graphs, and dynamic programming.
- 2nd Runner-Up in Studelence Hackathon Challenge organized at ABES Engineering College.
- Cybersecurity Essentials Certificate — Cisco.
